

International Journal of PharmTech Research will be covered by **EMBASE**

Dear S N Khadatkar Sir,

Elsevier Bibliographic Databases is pleased to inform you that **International Journal of PharmTech Research** has been selected for coverage in our Abstract & Indexing products **EMBASE** starting with **2009** published material.

Please be assured that, although for indexation purposes only, we do require access to the full text of your publication. We never make the full text available to our customers or any other third parties. Please note that your publication may be selected for other Elsevier products.

We would be pleased if you would complete and return the attached *Coverage Form* granting us permission to index your journal at your earliest convenience. Furthermore, it would be greatly appreciated if you would include the fact that your publication is covered by the databases listed above, in the colophon or on the cover of your journal.

Please feel free to write me for additional information or to address any questions that you may have with regard to Elsevier's A&I databases.

Thank you in advance for your cooperation.

Yours sincerely,

Gerrit Jan Kramer (Mr.)

Global Head Source Management, Elsevier B.V. , Bibliographic Databases

P.O. Box 2227, 1000 CE Amsterdam, The Netherlands

Elsevier Bibliographic Databases produces a range of leading abstract & indexing databases, which scans the world's STM serials literature for coverage across all science and social sciences disciplines. Databases include Scopus, EMBASE, EMCare, Compendex, GEOBASE, Elsevier BIOBASE, FLUIDEX, World Textiles and several specialized niche databases and other derivative products such as Mosby Yearbooks.
